DETAILED ACTION

The following is an examiner's statement of reasons for allowance: none of prior art of record taken alone or in combination shows a compact case comprising a cylindrically-shaped lower case integrally formed with a recessed axle-bearing portion , a cylindrically-shaped cover integrally formed with a hook at the front portion and a projected hinge at rear portion for rotatably mounting to the recessed axle-bearing portion through the hinge axle, a circumferential, cylindrically-shaped external frame with a soft elastic front portion for releasing the hook by pressing the front external surface, the circumferential external frame disposed between the lower case and the cover, a latching slot located on an arcuated segment of the circumferential external frame for latching the hook, and an inner liner formed with a cylindrically-shaped lateral skirt and a disk-shaped flange at the top surface and inserted inside of the circumferential external frame.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Quennessen, Pierson, Contreras, Favre and Morningstar et al are cited to show the state of the art with respect to a compact case.

The drawings filed 08/18/2003 have been approved by the Examiner.
